Hi, my name is

Donia Amer

A little about me

I'm a design oriented software engineer based in Toronto, Canada. Fueled by the challenge of solving complex problems, I'm always inspired to build products that start with the user and end with innovation.

For the past few years, I've been intrigued by front-end development and all its inner workings. My current toolset includes React, Typescript, and other various technologies related to them.

Education

York University | B.ENG. Spec Hons, Computer Engineering

How I can help

Front-End

Javascript/Typescript, React, NextJs, Gatsby, Angular, Redux, RxJs

Back-End

NodeJs, Express, SQL, NoSQL

Other Proficiencies

Figma, Illustrator, Canva

A few accomplishment

- Lead a pod of 3 developers to complete features and maintain a web portal for a public sector client.
- Independently delivered a native iOS application for a client in the airline industry.
- Engineered and launched an interactive Web3 rewards board game that drove 25% increase in user engagement.
- Architected and deployed a puzzle game with A/B testing, resulting in 3x player growth through optimized game mechanics and user experience

Where I've worked

Wattpad | Dec 24 - Present

Led frontend epics and small teams, shipping new user-facing features and driving a legacy-to-modern framework migration to improve scalability and long-term maintainability.

Laguna Games | May 23 - Aug 24*

Spearheaded web microsite initiative, building responsive and interactive experiences that increased player engagement and community reach.

AppCentrica | Aug 22 - May 23

Developed an offline-first React Native application enabling most functionality without connectivity.

InVision | Jun 22 - Aug 22*

Quickly ramped up on React micro-frontend architecture, collaborating with the team on bug fixes and improvements.

KOHO | May 21 - May 22

Delivered critical React features for the web application, focusing on responsive design, and implemented patterns that reduced development cycles.

Deloitte Digital | Aug 19 - May 21

Led and contributed to multiple enterprise projects spanning healthcare, finance and public sector clients.

IBM | May 17 - Aug 18

Drove site build efficiency and repository management, implementing automated testing workflows.

(*) Impacted by a mass layoff which was not based on performance
